

PATRIOT

PATRIOT FLUID END

In 2020 additional resiliency and maintenance ease is needed for fluid ends and fluid end replacement. Historically fluid ends have suffered from premature failure and service-related issues. Failure could occur from fatigue cracking through corrosion, wearing around the suction seal bore, valve seat cracks and many other points of vulnerability. The resulting downtime and financial impact create a need for more robust fluid ends. The **PATRIOT** fluid end is the solution. Please see the specs on the **PATRIOT** fluid end below.

Life Expectancy	3.5 X industry standard
Pump Integration	Direct fit to 1000/2250/2500 pumps
Replacement	Direct replacement for SGWS fluid ends
Spring Retainer	Spring retainer enables quick valve, seat, plunger, and packing replacement
Alignment	Alignment not needed for suction covers
Suction Cover Replacement	Special tooling not required for suction cover installation
Material	Stainless steel
Service	24/7
Country of Manufacture	United States
Distributor	Stout

Contact Stout for all your fluid end needs.
